**NOTES TO THE SEPARATE QUARTERLY FINANCIAL STATEMENTS FOR THE PERIOD
ENDED 31 DECEMBER 2025 (continued)****3 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)****(c) Investments****(i) Trading securities**

Trading securities are bonds and certificates of deposits held by the Company for trading purpose i.e. purchased for resale with the aim of making profits over a short period of time. Trading securities are initially recognised at cost which include purchase price plus any directly attributable transaction costs. Subsequent to initial recognition, they are measured at cost less interest income for the period before investment acquisition date and allowance for diminution in value. An allowance is made for diminution in value of trading securities if market price of the securities item falls below its carrying amount. The allowance is reversed if the market price subsequently increases after the allowance was recognised. An allowance is reversed only to the extent that the securities' carrying amount does not exceed the carrying amount that has been determined if no allowance had been recognised.

(ii) Held-to-maturity investments

Held-to-maturity investments are those that the Company's management has the intention and ability to hold until maturity. Held-to-maturity investments include term deposits at banks. These investments are stated at costs less allowance for doubtful debts.

(iii) Investments in subsidiaries, an associate and equity investment in other entity

For the purpose of these separate financial statements, investments in subsidiaries and an associate are initially recognised at cost which includes purchase price plus any directly attributable transaction costs. Subsequent to initial recognition, these investments are stated at cost less allowance for diminution in value. An allowance is made for diminution in investment value if the investee has suffered a loss which may cause the Company to lose its invested capital, unless there is evidence that the value of the investment has not been diminished. An allowance is not considered to be made for the investment when the Company may not lose its invested capital. The allowance is reversed if the investee subsequently made a profit that offsets the previous loss for which the allowance had been made. An allowance is reversed only to the extent that the investment's carrying amount does not exceed the carrying amount that would have been determined if no allowance had been recognised.

(d) Accounts receivable

Other receivables are stated at cost less allowance for doubtful debts.

(e) Tangible fixed assets**(i) Cost**

Tangible fixed assets are stated at cost less accumulated depreciation. The initial cost of a tangible fixed asset comprises its purchase price, including import duties, non-refundable purchase taxes and any directly attributable costs of bringing the asset to its working condition for its intended use, and the costs of dismantling and removing the asset and restoring the site on which it is located. Expenditure incurred after tangible fixed assets have been put into operation, such as repair, maintenance and overhaul cost, is charged to the separate statement of income in the period in which the cost is incurred. In situations where it can be clearly demonstrated that the expenditure has resulted in an increase in the future economic benefits expected to be obtained from the use of tangible fixed assets beyond their originally assessed standard of performance, the expenditure is capitalised as an additional cost of tangible fixed assets.

Deferred tax is provided using the balance sheet method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities using tax rates enacted or substantively enacted at the end of the accounting period.

Non-redeemable preference shares are classified as equity, because they bear discretionary dividends, do not contain any obligation to deliver cash or other financial assets and do not require settlement in variable number of the Company's equity instruments. Discretionary dividends thereon are recognised as equity distributions on approval by the Company's shareholders.

(iii) Other capital

Agreements to issue a fixed number of shares in the future are recognized based on their fair values at the dates of the agreements under other capital if there are no other settlement alternatives.

(m) Financial income

Financial income comprises dividend income, interest income from bank deposits, bonds and loans receivable, gains from disposals of investments and foreign exchange gains.
